FEATURES

Kubota diesel engines

Powerful Kubota diesel engines mean faster, more efficient job performance. These F-Series diesel engines have power to spare. Their high torque rise ensures faster, smoother recovery under sudden loading, letting you power through tall or wet grass without skipping a beat. They're also environmentally and economically friendly, thanks to their enhanced combustion efficiency, low vibration and noise levels, and reduced fuel costs.

Hydrostatic power steering

Hydrostatic power steering reduces operator fatigue and makes it easier to mow around trees and other obstacles.

Dual-element air cleaner

The dual-element air cleaner helps keep the engine running smoothly and efficiently. Only the outer filter needs to be replaced—the inner filter can be cleaned with a blower—helping to reduce maintenance costs. The F3680 air cleaner is equipped with a choke indicator that turns red when the filter needs cleaning or replacement.

Integrated radiator screen

The easy to clean radiator screen is integrated into the engine cover to help keep the engine running cool and efficiently. A water gauge and overheat alarm are standard equipment to prevent damage should an incident occur.

Fuel gauge

No more guessing how much fuel remains in the tank. A dash-mounted fuel gauge makes fuel level monitoring simple, with a quick glance at the front panel.

FEATURES

Tool box

Conveniently located under the seat, the tool box provides fast-access storage for your tools. It's also an ideal place to store your operator manual for quick and easy reference while on the job.

90-degree tilt mower deck

The mower deck tilts to a full 90 degrees, providing unobstructed access to the blades and deck underside for easier cleaning and maintenance.

Deluxe seat

The F-Series' high level of comfort starts with a deluxe high-back seat with four separate adjustments—weight control, lumbar support, back angle, and arm rests—to provide every operator with a custom fit and optimum comfort.

Operator levers

For easier operation and greater convenience, the High/Low speed lever, deck lifting lever, and PTO engagement lever are ergonomic in height and located to the side of the operator. The lever guides have also been designed for quick, at-a-glance identification.
