

RTV

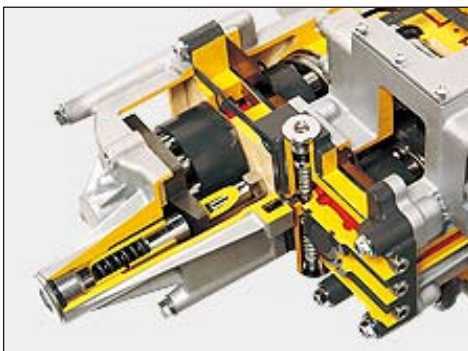

RTV1140(FRONT)

FEATURES

High Power Diesel Engine

The Kubota D1105 3-cylinder engine, with 1,123cc and 24.8HP, gives the RTV1140CPX excellent acceleration and the ability to take on almost any terrain or task.

VHT Plus (Variable Hydro Transmission)

A Kubota exclusive! The RTV1140CPX's high-performance, three-range VHT Plus offers you the performance you require under demanding conditions. Tackle hills with strong acceleration, smooth, engine-assisted deceleration and superior "hill-holding" abilities. VHT Plus has the power and control to safely take you just about anywhere.

3-step conversion

1. Fold the front and sides of the bed.

The front and front sides of the cargo bed have been built with hinges to conveniently fold up and in towards the back of the bed.

2. Flip down the two-person bench seat and lock it in place.

Next, flip down the hinged bench seat and secure it into place.

3. Slide back the protective screen.

Finally, slide back the protective screen and attached seat back all the way to the bed and lock it in place. Now you're ready to ride. Reverse these three actions for access to the RTV1140CPX's full bed capacity.

Front Suspension

The MacPherson Strut-type suspension on each of the front wheels - an independent suspension system - maximizes shock absorption as well as minimizes body tilt.

Reinforced Steel Front Guard

Unlike some competitive machines that have decorative brush guards, the heavy-duty, reinforced steel of our front guard offers protection.

RTV

RTV1140(FRONT)

FEATURES

ROPS Protection

A sturdy standard ROPS (Rollover Protective Structure) and heavy-duty protective screen provide rollover protection to the operator and passengers when seatbelts are worn. The RTV1140CPX's ROPS is OSHA 1928.52 compliant.

Reliable, Wet-type Disc Brake

Taking on a hilly terrain means frequent braking. With our light-step, wet-type disc brake, you'll stop quickly and effortlessly. Plus, its durability means no drop in performance due to wear.

Hydrostatic Power Steering

Quick, responsive and agile on all terrains. Kubota RTVs were first in their class to be equipped with hydrostatic power steering. The RTV1140CPX is no exception.
