

B

B2630/B3030

FEATURES

High-output engine

To help you tackle tough jobs, the B2630 and B3030 deliver 26 horsepower and 30 gross engine horsepower, respectively.

Hydraulic independent PTO

An efficient feature that keeps you working, the independent PTO lets you engage or disengage both the mid and rear PTO without having to stop the tractor.

More powerful HST

For increased efficiency, we made our new HST more powerful. For easier operation, there's only one pedal and we made it wider.

Mechanical cruise control

At any speed, cruise control allows you to smoothly set, increase/decrease, and override (depress HST pedal) pre-set speeds without resetting the cruise control lever.

Multi-reflective headlights

No matter when or where you're working, our new, multi-reflective headlights will let you see further and better.

B

B2630/B3030

FEATURES

Slant-nose hood

For a better view of what's up ahead as well as efficient front-loader operation, the hood has a slanted-nose design.

Tilt steering wheel

To provide a more comfortable driving position, the steering wheel tilts upward and downward.

3-point-hitch position control

This feature gives you more precise control of your rear implements.

Front grille

The newly designed front grille is a perfect match with the B2630 and B3030's slanted-nose design. It's also easier to clean.

Hydrostatic power steering

This must-have feature provides nimble handling while greatly reducing fatigue during long hours of operation.

B2630/B3030

Kubota

FEATURES

Widely spaced fenders

By setting rear fenders further apart, we created more space for the operator. By angling control levers toward the operator, they're easier to reach. And, enlarged lever guides make for easy control lever recognition.
