

B

B3300SU (FRONT)

Kubota

FEATURES

Hydrostatic Transmission

When frequent changes in speed and direction are needed, HST responds with its convenient pedal control—which leaves your hands free for steering and implement control.

Loader Valve

Loader operations are more convenient with the 4-position valve and control lever. Integrated into the tractor, this ergonomically positioned valve lets you attach the front loader and other front implements quickly and easily.

Power Steering

High-capacity power steering offers higher torque, giving you responsive control, and a vibration dampening mechanism which helps reduce fatigue and increase comfort during long days on the job. In addition, maneuverability in soft ground is made much easier, especially during loader applications.

Diesel Engine

The B3300SU features a smooth-running 33HP, 4-cylinder, liquid-cooled diesel engine, with Kubota's E-TVCS (three-vortex combustion system) for increased power, high torque and cleaner emissions.

Double-Element Air Cleaner

Standard on the B3300SU, Dual-Element Air Filters keep the engine running cleaner in dirty conditions, and simplifies maintenance.

B

B3300SU (FRONT)

Kubota

FEATURES

Slanted Metal Hood

The slanted hood offers a clear view of front loader operations to improve operator productivity.

Headlights

Kubota's multi-reflective headlights let you see farther and better, so you can work effectively whenever and wherever you want.

Front Grill

The redesigned front grill is easy to clean and perfectly matches the B3300SU's slanted-nose design.

Loader Package

Kubota has packaged the new B3300SU tractor with a performance matched Quick Attach/Detach Loader adding more overall customer value.

Large Industrial Tires (Optional)

For better performance and traction, the Heavy-Duty R4 industrial tires (Front: 25 x 8.5-14 Rear: 15-19.5) are optional.
